8	Video	youtube.com/watch?v=ehD			Meet Thomas: the kid who became an Iphone App Developer at age 12. We hope this inspires our UCoders!
9	Article	om/five-positive-effects-techr	Five positive effects of Technology on education		Technology has begun to revolutionize how children (and adults) are learning in the classroom. Here are five positive effects the the tech world is having on education.
10	Photo	--	--	UCode Image 4	Ucoder Fun Fact: While the term 'bug' in the meaning of technical error was first coined by Thomas Edison in 1878, it took another 60 years for someone else to popularize the term. In 1947, Grace Hopper recorded the first computer 'bug' in her log book as she was working on a Mark II computer. A moth was discovered stuck in a relay and thereby hindering the operation. On her note, she wrote, "First actual case of bug being found." (via The Next Web)
11	Article	weareteachers.com/skills-le	Ten surprising skills kids learn through coding	--	Learning to code is more than an education in technology. See these other valuable life skills that your child can pick up along the way.
